

Mrs Foosiya Musse
Parent Governor

I am a parent governor for the second term. I am also a qualified and registered nurse. Every governor has a role; my role is that I am part of the science committee. I like being part of the governor meetings because I feel like I am part of my own child's educational well-being. My child is in Year 6.

Being a parent governor also allows me to understand and monitor the progress the school is making and also planning ahead for the coming future. It gives me a sense of awareness and pride to be part of a very worthwhile cause. This position allows me to be updated on the way education is changing and how it affects the school, staff and the children. This has given me insight on how the school is working to boost students' progress now and in the future.
